

## **Dear Student,**

If you own your own computer, but use the UKZN internet network, you may have difficulty getting the Dropbox application on your computer to connect to the internet. You need to have it connect to the internet to view and complete our programming course materials. Once Dropbox connects to the internet, the files our programming course automatically appear on your computer, inside your Dropbox folder located at:

*My Documents/Dropbox/firstNameLastLetterSurname*

## **Please do the following to fix the Dropbox connection**

- 1.) Find the Dropbox application on your computer (by searching for it from the start menu, or running the installation file from <https://www.dropbox.com/install>)
- 2.) Double click it to ensure it is running. Now in the right bottom corner of your computer, on the taskbar next to time and date, find the little Dropbox icon.
- 3.) Right click the icon, and go to preferences. A box like the one below will open. Click the 'Proxies' tab on the top panel.

4.) Make the page look like the image above exactly, but enter your own UZKN student number and password in place of the one above.

5.) Click 'Ok'. Now go back to the bottom right corner of your screen and mouse over the Dropbox icon. Does it say syncing? If it does, wait and eventually there will be a green tick on the icon. Now go to your Dropbox folder (My Documents/Dropbox) and you should see the folder you shared with us. Inside it will be the programming task files and you can get started by reading the Welcome doc!

*If you still can't get it to work after trying this, please email [students@hyperiondev.com](mailto:students@hyperiondev.com) or you may also add [0837538449](https://www.whatsapp.com/channel/0029va833333333333333333) on Whatsapp to arrange for free in person assistance at UKZN.*
