

“Quick Start with Hyperion”

Getting help

There are many ways to get help - even without a computer or internet. Please read carefully.

Dear Student,

For more information visit www.hyperiondev.com.
Please read this document carefully and follow all relevant instructions carefully.

We hope to take you places.

Getting help on Piazza

You will need internet access on any device (even a phone) to complete this step.

1. Visit the following web address: www.tinyurl.com/hyperionpiazza

The screenshot shows the Piazza website interface for Hyperion Development. The page has a blue header with the 'piazza' logo and a 'Log In' button. Below the header, the text 'Hyperion Development' is displayed with a '(change school)' link. A 'Welcome to Piazza!' message is on the left. The main content area shows 'Your Fall 2012 Classes:' with a list of classes. The first class is 'Class 1: Hyperion Programming 1: Introduction to Programming' with 133 enrolled students. To the right of this class is a 'Class Access Code' field with the code 'Hyperion' entered. A red arrow points to this field. Below the class list are input fields for Class 2, Class 3, Class 4, and Class 5. At the bottom, there is an 'Add Classes' button.

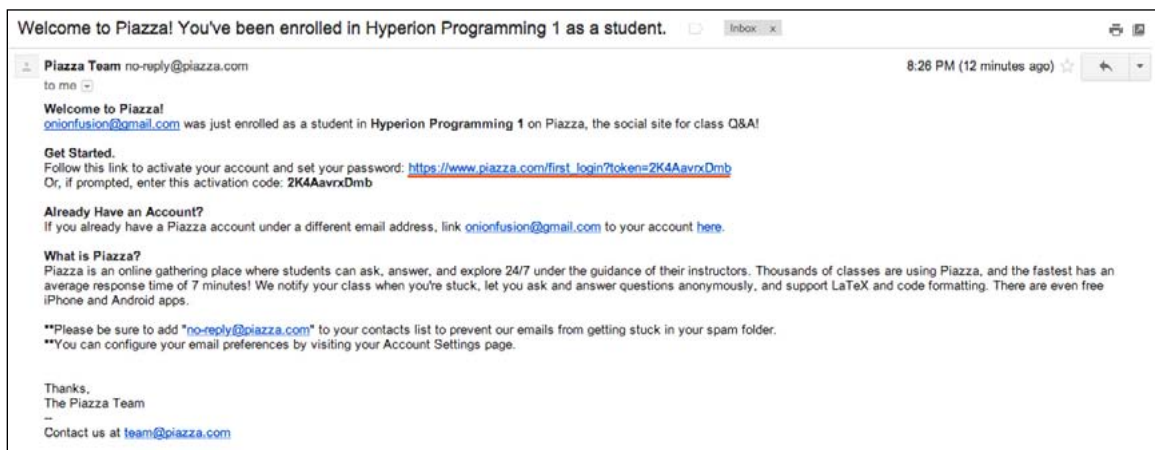

2. The above should appear. Enter "**Hyperion**" in the "Class Access Code" field.

This screenshot is a closer view of the Piazza interface. It shows the 'Class 1: Hyperion Programming 1: Introduction to Programming' with its details. Below the class name, there are radio buttons for 'Join as: Student', 'TA', and 'Professor'. The 'Student' option is selected. To the right, the 'Class Access Code' field still shows 'Hyperion'. At the bottom of the page, a red arrow points to the 'Add Classes' button.

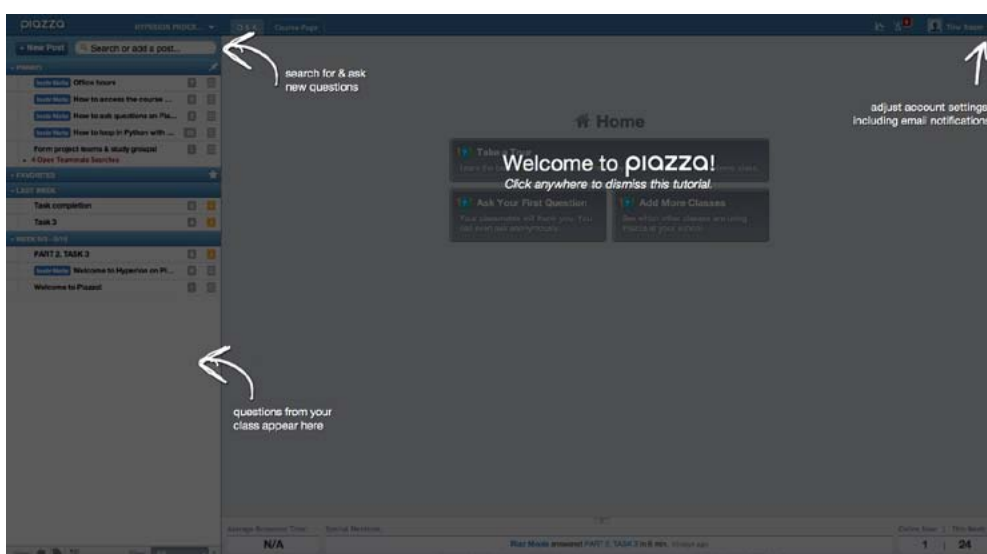

3. Select "**Student**" by clicking the circle to its left. Then click "**Add Classes**".

The screenshot shows the Piazza website interface for Hyperion Development. At the top, there's a 'Log In' button. Below the header, the page title is 'Hyperion Development' with a '(change school)' link. Under 'Your Classes:', there's a list of classes, with the first one being 'Hyperion Programming 1: Introduction to Programming'. Below this, a form prompts the user to 'Please enter your school email address'. It includes a text input field for 'Email', a 'Confirm Email' field, and a 'Submit Email' button. A red arrow points to the 'Email' input field. At the bottom, there's a small note: 'Unable to sign up? Email us at team@piazza.com or call us at 1-800-618-4124, and we'll help you get started!'.

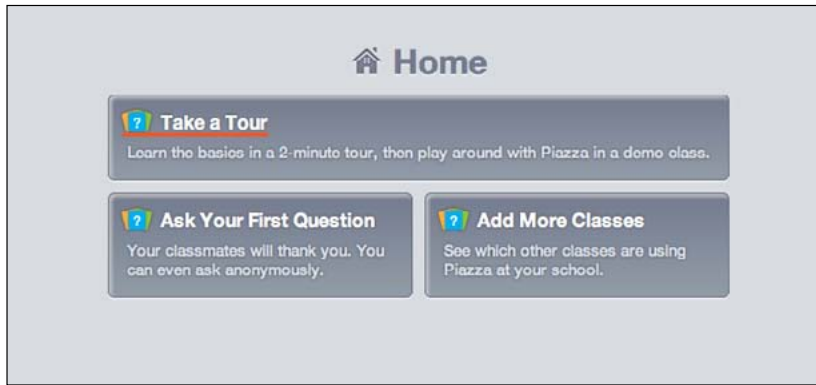

4. Proceed to enter your **email address** and confirm to enrol for our programming course.

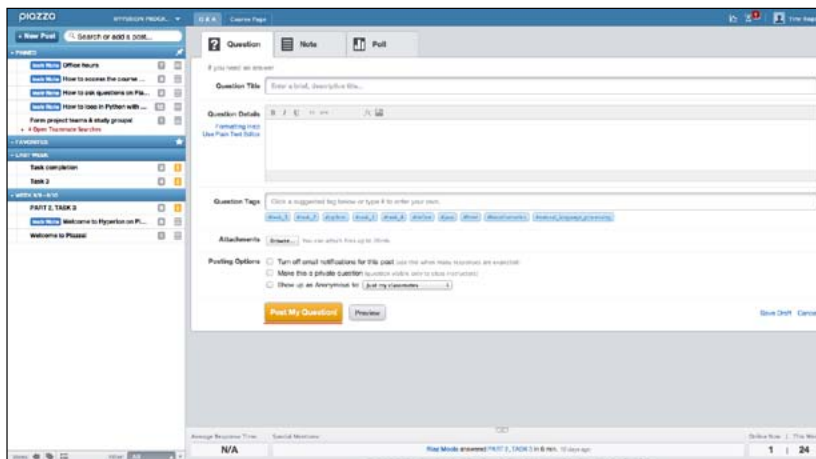

5. You should soon receive an email like above, guiding you on how to **confirm** and begin your learning with Hyperion.

6. Once you log in to your Piazza home page, **click anywhere to dismiss** the tutorial.

7. We recommend that you **"Take a Tour"** before continuing. Once you've completed the tour, click **"New Post"** top-left to post a question for our teachers to assist you with.

8. Here you can choose a **Question Title**, type out your **Question Details**, add **Question Tags** that make your question easier to recognise and add **attachments**. Our teachers will be notified once you click **"Post My Question!"** and assist you.

Getting help on Facebook

1. Find us at www.facebook.com/hyperiondev, where you can "like" *Hyperion Development* and post any questions or any requests for help on our wall.
