The blaze, the splendor, and the symmetry.

"Quick Start with Hyperion"

Situation 1

I am on my own personal computer using my own internet connection. I am not at a LAN and I am not on my cellphone.

Dear Student,

For more information visit **www.hyperiondev.com**. Please read this document carefully and follow all relevant instructions carefully.
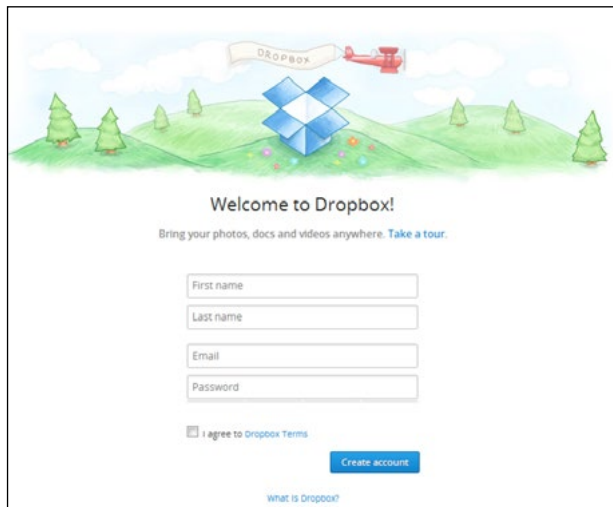

We hope to take you places.

—The Hyperion Team

Situation 1

**I am on my own personal computer using my own internet connection.
I am not at a LAN and I am not on my cellphone.**

1. Click on **(this link)** and the following page
   should open:

2. **Fill in** your First name, Last name,
   Email address and Password.

3. Tick the "I agree to Dropbox terms"
   box and click **"Create Account"**.

4. You should now see the following page. Make sure the Dropbox download
   starts in the left corner of your page (shown with a red arrow).

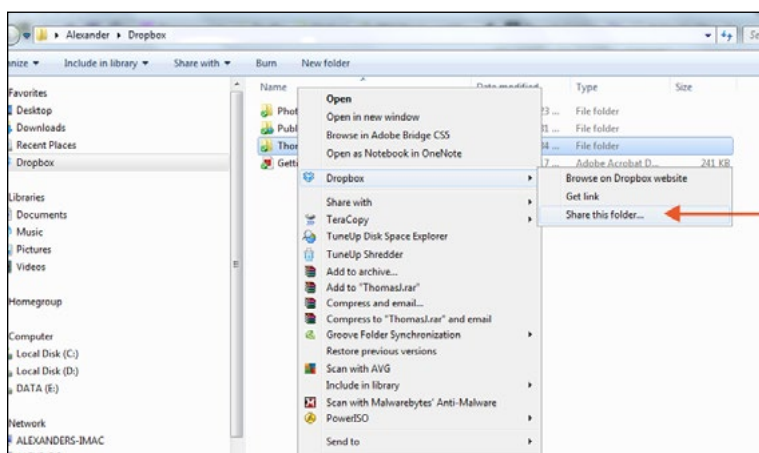

5. Follow the installation options shown on this page (double click the **Dropbox-1.4.17.exe**
   file to run it, allow it to make changes to your computer and follow the steps to install it
   to your hard drive).

6. Once Dropbox is installed, open your "**My Computer**" folder. A fast way to do this
   on Windows is to go to Start -> Run and type in three dots (...) and press Enter. If you
   are not on Windows, open your file system explorer of your system.

7. When "My Computer" opens, it may not look *exactly* like this. Find the "**Dropbox**" link on the left panel as pointed to in red in the picture above and click on it.

Name	Date modified	Type	Size
Photos	2012/09/24 12:23 ...	File folder	
Public	2012/09/24 12:31 ...	File folder	
ThomasJ	2012/09/24 12:34 ...	File folder	
Getting Started.pdf	2012/07/25 06:17 ...	Adobe Acrobat D...	241 KB

8. Create a **new folder** with your **first name and surname initial** (example above).

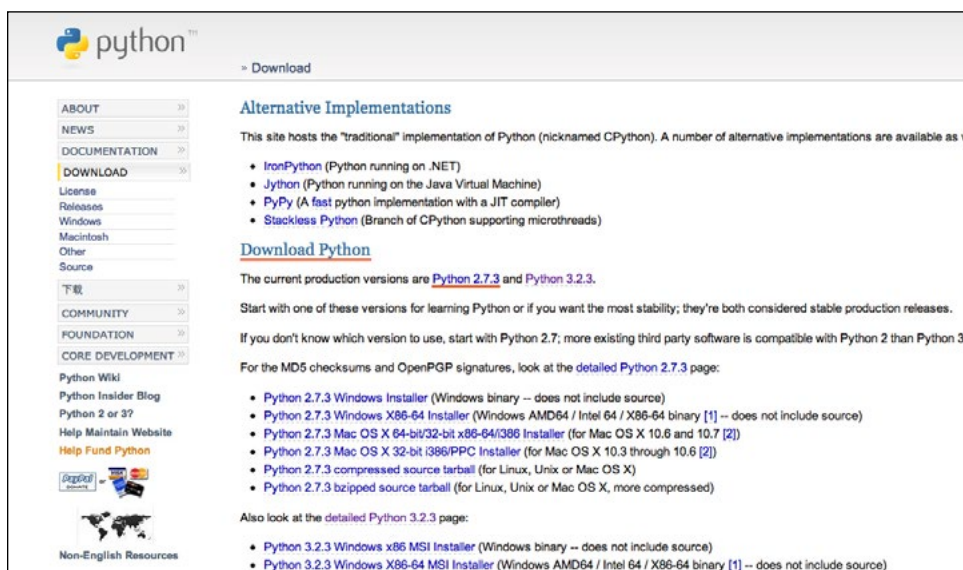

9. **Right click** on your folder, go to "Dropbox" and click "**Share this folder...**".

1. A dialogue box will pop up. Enter the email address **moolriaz@gmail.com** into the box as shown above and then click "**Share folder**".

Installing Python

1. Go to **http://www.python.org/download/** and the following page should appear:

2. Download the **Python 2.7.x (any version such as 2.7.3 or 2.7.5)** under "Download Python" and continue with the simple installation.
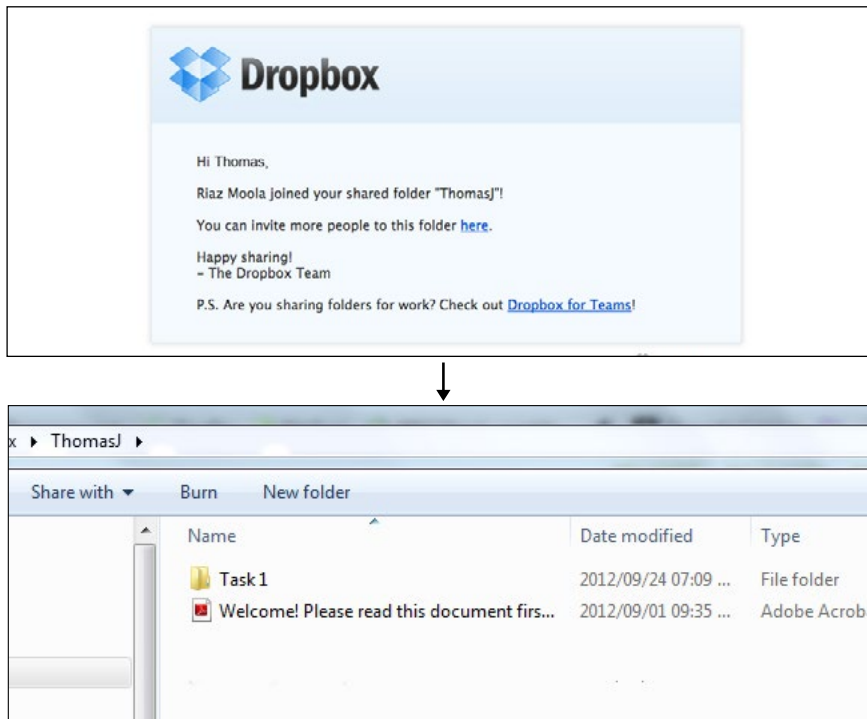

Installing Notepad++

1. Go to **http://notepad-plus-plus.org/download/** the following page should appear:

2. Download the "**Notepad++ Installer**" and continue with the simple installation.

Accepting your Dropbox invitation

1. Please **await an acceptance email** (this will take a few hours) of your Dropbox invitation, which is when we give you your **first Python task** in the new folder you have shared with us. It will look as shown above in your system explorer.

2. You should read the **introductory** PDF document.

You're now ready to start learning!

Good luck!
